

# Large Submersible Pump Delivered in Outstanding Time

*“ We were impressed with All Pumps’ support and expertise, in being able to offer an equivalent of such a large pump. The delivery time was unbelievable!*

---

## THE CHALLENGE

The customer, a resort in far north Queensland had two existing submersible sewage pumps, with one failing two days prior to Easter. The resort was hosting a large wedding over the Easter break and could not afford to rely on a single pump. They needed a new pump on site and installed, by the Thursday afternoon at the latest.

---

## THE SOLUTION

All Pumps offered an ABS sewage pump with an adapter to slide down the existing guide rail system, which saved a significant amount of time and money. It was air freighted and on site within 24 hours of the customer contacting All Pumps. The customer had the peace of mind, that he wasn’t going to have any unwanted issues with his sewage system over this very special time.
